PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student and Full Stack Developer Intern with hands-on experience building and deploying web applications using React.js, Next.js, Node.js, Django, Spring Boot, and PostgreSQL. Completed internships at YuvaIntern (Full Stack) and Anudip Foundation (Advanced Java). Built VertexPath, an AI-powered career platform with RAG, voice interviews, and microservices. Passionate about scalable systems, clean REST APIs, and intuitive interfaces. Seeking Full Stack Developer roles.

WORK EXPERIENCE

Junior Full Stack Developer Intern — YuvaIntern **Jul 2026 – Aug 2026 · 2 mos**

Internship · Pune, Maharashtra, India · Hybrid

- Built SkillSwap, a MERN peer-to-peer skill exchange platform where students and freelancers match and trade skills cash-free, using React 19, Vite, Node.js, Express, and MongoDB.
- Implemented real-time chat with Socket.IO rooms so messages reach only the two matched users, and designed Mongoose schemas for users, skill listings, sessions, and messages.
- Secured the app with JWT authentication, bcrypt password hashing, and express-validator middleware, with token persistence and background validation so users stay signed in across reloads.
- Wrote automated API tests with Jest and Supertest and added a database seeder that pre-populates demo data for easy testing and review.

Java Programming Intern — Anudip Foundation **Feb 2026 – May 2026 · 4 mos**

Internship · Pune District, Maharashtra, India · Hybrid

- Mastered Advanced Java concepts including OOP, exception handling, collections, multithreading, JDBC, and database connectivity across a structured 4-month internship program.
- Developed console-based and application-oriented programs, improving problem-solving, debugging, and backend development skills.

Introduction to Programming — Anudip Foundation **Mar 2025 – May 2025 · 3 mos**

- Completed a 132-hour course with an A1 grade covering programming fundamentals, logic building, and core software development concepts in Java.

Web Development Trainee — Sumago Infotech Pvt. Ltd. **Jul 2022 – Aug 2022 · 2 mos**

- Completed industrial training in frontend web development (HTML, CSS, Bootstrap), building responsive, user-friendly static web pages with cross-browser compatibility.

PROJECTS

VertexPath (formerly PathPilot AI) — AI Career Platform GitHub | Live Demo

React, Spring Boot, FastAPI, PostgreSQL, Docker, Google Gemini API

- Architected a microservice-ready career platform combining a Spring Boot + JWT core, a FastAPI/LangChain AI microservice, and a React/Vite frontend, orchestrated with Docker Compose.
- Built an ATS resume analyzer, JD compatibility matcher, and a RAG-based document Q&A system using ChromaDB and Google Gemini, plus an AI resume bullet optimizer that rewrites bullets using the Google XYZ formula.
- Developed a voice-powered mock interview simulator (Web Speech API text-to-speech and dictation, timed mode, 0–100% strict grading) and an in-browser code editor that audits time/space complexity and suggests refactors.
- Shipped a salary and negotiation copilot (percentile compensation breakdown, counter-offer generator), an AI cold-outreach DM generator, a public shareable developer portfolio, a Ctrl+K command palette across 10+ modules, and a gamified streak/XP dashboard with verified readiness badges.

Lake N Trails — Exotic Glamping Portfolio GitHub | Live Demo

Next.js 15, React 19, TypeScript, Tailwind CSS, Framer Motion, Lenis

- Engineered an interactive booking wizard using client-side React hooks to dynamically calculate package tariffs, weekday/weekend rates, child discounts, and pet add-ons with tax invoice generation.
- Implemented a dark/light dual-theme architecture with local storage persistence and server-side preloader classes to avoid hydration mismatch flashes.
- Curated and optimized 120+ media assets and built a responsive fullscreen lightbox with z-index stacking to resolve overlap issues on mobile.

College Discovery Platform GitHub | Live Demo

Next.js 14, Node.js, Express.js, PostgreSQL, JWT, Tailwind CSS v4

- Architected a production-grade platform featuring 30+ elite Indian institutions with real-time search, filtering, and a side-by-side college comparison engine.
- Built a JWT-authenticated Q&A community forum and an AI-backed college predictor matching JEE ranks against cutoff data using serverless PostgreSQL (Neon).

- Deployed frontend on Vercel and backend on Render with BcryptJS authentication and environment-driven configuration.

MindEase — Student Wellness Ecosystem GitHub

React.js, Spring Boot, Web Audio API, Firebase

- Built a full stack wellness platform with role-based access for students and counselors, featuring mood tracking, personalized insights, and a campus-wide monitoring portal.
- Implemented OTP-based 6-digit authentication with decentralized encryption and integrated the Web Audio API for real-time breathing guidance.

Developer Portfolio Website GitHub | Live Demo

HTML5, CSS3, TypeScript, Vercel

- Designed and deployed a personal developer portfolio with dedicated sections for experience, projects, certifications, education timeline, and categorized technical expertise, giving recruiters a single link to review my work.
- Built a responsive dark-themed interface with glass-style skill cards and a particle-style background, and added SEO meta tags (title, description, keywords) for discoverability.

EDUCATION

Bachelor of Technology — Computer Science & Engineering **Sep 2024 – 2027**

Alard Group of Institutes (Alard University), Pune

Diploma in Computer Science & Engineering **2021 – 2023**

Government Polytechnic Nandurbar, Maharashtra, India

School (CBSE) **Jun 2015 – Mar 2020**

Podar International School, Nandurbar, India

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vite, Angular, Tailwind CSS, Bootstrap, HTML5, CSS3, TypeScript, Socket.IO Client
Backend: Node.js, Express.js, Socket.IO, Django, Spring Boot, FastAPI, REST APIs, JWT, BcryptJS
Databases: MongoDB (Mongoose), MySQL, PostgreSQL — schema design, CRUD operations, relational modelling
Languages: JavaScript, TypeScript, Python, Java, C
Tools: Git, GitHub, Docker, VS Code, JetBrains IDEs, Vercel, Netlify, Render, Postman, Firebase, Jest, Supertest
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

CERTIFICATIONS

- Virtual Internship Program (ServiceNow Administration Fundamentals, CSA Exam Prep) — ServiceNow University & SmartBridge (Jul 2026)
- Java Programming Fundamentals — Infosys Springboard (May 2026)
- Artificial Intelligence Fundamentals — IBM | Software Engineering Job Simulation — JPMorgan Chase
- Getting Started with AI — NVIDIA | Computer Vision with Azure — Microsoft

ACHIEVEMENTS

- A1 Grade — Introduction to Programming: Top grade in a 132-hour structured programming course at Anudip Foundation, demonstrating strong foundational software development skills.
- 6 Industry Certifications: Earned from IBM, Microsoft (Azure), NVIDIA, JPMorgan Chase, and Infosys, spanning AI/ML, cloud, and professional engineering simulations.
- Production Deployments: Built and deployed 4+ full stack projects including 2 production-ready applications — indexing 30+ colleges, serving real users, with live deployments on Vercel and Render.
